

# 100% Fiber Internet

## Neighbors and Friends,

Omni Fiber is excited to announce a multimillion-dollar investment to build the fastest, most reliable and advanced Internet access network in Perrysburg. Omni Fiber's state-of-the-art network will deliver symmetrical speeds up to 2 Gig (also known as 2 Gbps or 2,000 Mbps) that cable companies can't match, the most advanced Wi-Fi service to cover your entire home, and affordable TV and phone service – all backed by a local customer service team. Omni Fiber will install a 100% fiber-to-the-home network along utility easements to bring these valuable services directly to your home. Below you will find information about what to expect as we build our fiber-optic network in your community.

### Before we start.

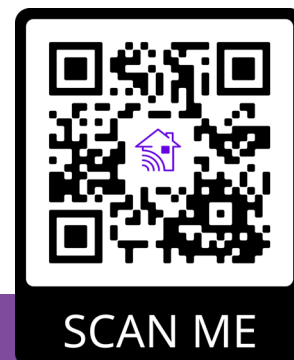

Before construction activities get underway, you may notice colored flags and temporary bio-degradable paint marking the location of some underground utilities. These flags and markers are placed by an authorized third party in compliance with local guidelines and do not necessarily indicate where fiber installation will occur. For safety, please do not remove these utility markers until after property restoration is completed.

### What's next?

Once existing utilities have been marked, our professionally trained and certified contractors will attach fiber-optic cables to existing utility poles or place them underground. Our contractors may also be accessing public utility easements on or near your property, marking utilities and, in some cases, digging in some neighborhoods.

Be one of the first in  
Perrysburg to enjoy the  
Fastest Internet in Town!

### About Omni Fiber

Omni Fiber provides 100% Fiber Internet, TV and Phone services to residential and business customers in the midwestern United States. The Omni difference includes speeds up to 2 Gig, no data caps, and competitive pricing. We look forward to serving your community!

# 100% Fiber Internet

If you have a sprinkler system, invisible fence, sump pump line, or other underground items near utility lines crossing through your property, please mark them with white or pink flags or landscape-safe paint AND report them by submitting the Construction Feedback Form available at [omnifiber.com/construction](https://omnifiber.com/construction).

Our teams will be working quickly and safely to minimize any inconvenience to you. Once construction is complete, we make every effort to return construction areas back to their original condition.

### Questions?

Visit [omnifiber.com/construction](https://omnifiber.com/construction) for more information about the construction process. If you have additional questions or concerns not covered in our FAQs, please call us at 419-482-8692.

### Be one of the first to experience the fiber difference!

Visit [omnifiber.com](https://omnifiber.com) to learn more about our services and **place a no-obligation pre-order** now to be one of the first to receive access to the future-proof fiber network, as installation appointments will be in high demand and available on a first-come, first-served basis. Once construction is complete in the utility easement, we will contact you to schedule an installation appointment to run the fiber optic cable into your home.

We look forward to becoming part of your community and hope to welcome you into the Omni Fiber family soon.

Sincerely,

*Darrick Zucco*
